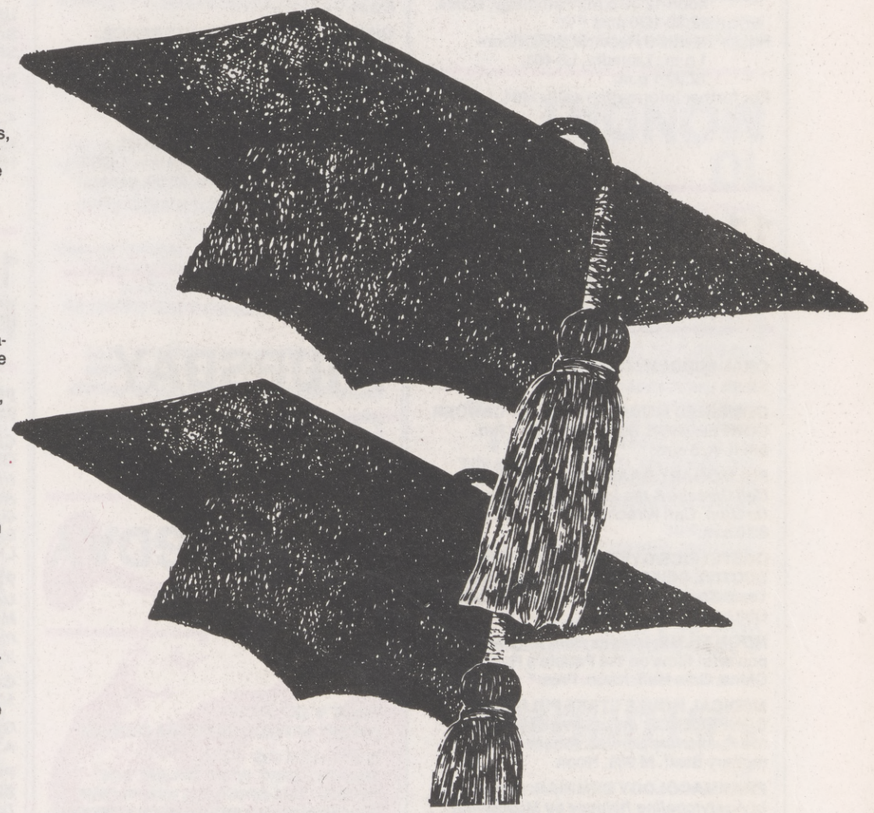
DEADLINE

Deadline for the next issue of *Today & Tomorrow,* which will cover the period May 22 to June 4, will be **Tuesday, May 11, 11 a.m.** Please send your copy to Allen Balderson, News & Public Information Services, 532 Parnassus Ave., Rm. 300, x1541 or x2557.



One hundred fifty-one students will receive MD degrees at the School of Medicine Commencement Exercises on Saturday, May 29 at 2 p.m. at Zellerbach Auditorium, UC-Berkeley. Forty-two PhDs, ten Masters, five DMH and one Bachelor of Medical Sciences degrees also will be awarded.

Congressman Ronald Dellums will deliver the 1982 convocation and students Lisa Capaldini and Eric Whyte will be speakers from the senior class. Dean Julius R. Krevans will present the students and Chancellor Sooy will confer degrees.

The program also will include presentation of the prestigious Gold Headed Cane Award, a trditional honor originating in the 16th century London medical society, which is given to the graduate who best exemplifies the qualities of the ideal physician.

The Kaiser Awards for Excellence in Teaching, established by the Henry J. Kaiser Foundation, will be presented to outstanding faculty members, along with 11 teaching awards given by the senior class.

UCSF microbiologists Harold E. Varmus and J. Michael Bishop have been named California Scientists of the Year by the state's Museum of Science and Industry.

They will share the $5,000 prize "for their discovery that normal cells contain a normally benign gene that can become a cancer-causing agent, especially when activated by viruses," the award read.

Bishop and Varmus are the first UCSF scientists to receive the top science award given by the state. Three prior recipients have gone on to win Nobel prizes for the work that earned them the state award.

Bishop, who is director of the Hooper Foundation, and Varmus, have helped generate a theory, now gaining wide acceptance, that human cancer begins when something triggers one of a cell's genes to overproduce a protein usually found only in trace amounts. No one has shown this to be the case in humans, but Bishop, Varmus and others have shown it in animal tumors.

Harry Edwards, PhD, associate professor of Sociology, UC-Berkeley, will be the guest speaker for the annual Martin Luther King Day, sponsored by the UCSF Black Caucus, and co-sponsored by the Black Students Health Alliance, the Office of Public Service Programs and the Committee for Arts and Lectures.

The event will be held in Cole Hall on Friday, May 21 from noon to 1 p.m. The entire campus is invited to attend.

Edwards, an outspoken expert on sports and blacks' participation in sports, was credited for the raised fists of the American black athletes at the 1968 Olympics in Mexico City. He is the author of five books, including *The Struggle That Must Be, Sociology of Sports* and *The Revolt of the Black Athlete.*

Soloist for this special program, commemorating the origin of the UCSF Black Caucus, is tenor Charles Cannady, laboratory operations assistant in the Department of Immunology.

NEWS BRIEFS

The highest honor of the French government has been awarded to Piero Mustacchi, clinical professor of Medicine and Preventive Medicine, Department of Epidemiology and International Health.

In a ceremony on campus, April 29, Mustacchi received the insignia of the French National Order of the Legion of Honor, bestowed on him for 25 years of prominence in professional activity. Mustacchi, who also heads the Division of Occupational Epidemiology, was honored for his work in developing academic and medical links between UC and universities in France and French-speaking Africa. He has provided visiting French physicians with continuing medical education through meetings and programs around the country.

Mustacchi, who joined the UCSF faculty in 1953, has studied the incidence of leukemia, cancer of the thyroid gland and malformations of the heart in S.F. residents. He is presently the physician and honorary vice counsul to the Italian Consulate General in San Francisco.

Staff employees may make recommendations about the campus' July 1 range adjustment needs. Ideas should be sent to Charles Francis, Personnel Manager, Room U 12, before Friday, May 14.

UC-systemwide ranges are based on a combination of salary survey data from the Bay Area, Sacramento, and the greater Los Angeles area. Most local ranges are based on rates paid in S.F. survey hospitals. Other factors considered are recruitment and retention difficulty and internal relationships.

For further information contact the classification services analyst for your department. Recommendations from employee organizations are to be coordinated through Tom Matteoli in Labor Relations. Copies of written presentations from employees are forwarded to UC-Systemwide Administration along with campus proposals.

Donald F. Beste, Jr. director of Pharmacy Services for Hospitals and Clinics, has left the UCSF campus as of May 7 to become director of Pharmacy Services at the King Khalid Hospital of the King Saud University in Riyadh, Saudi Arabia.

Beste, who was also associate dean for Pharmaceutical Services and associate clinical professor of Pharmacy, came to UCSF in 1973 from the Yale-New Haven Hospital, where he was director of Pharmacy Services.

The Dean's Prize in Student Research has been awarded to three medical students, who will present their research on Monday, May 17 in S 214 at 5 p.m.

The prize, awarded annually, acknowledges outstanding research work done by students in the Summer Fellowship Program.

The recipients and the titles of their talks are:

- Scott Kelley, first year, "Destruction of Human Fibroblast Extracellular Matrix by Metastatic Tumor Cells." Sponsor, Randall H. Kramer, Oral Medicine and Hospital Dentistry.
- Joy Melnikow, third year, "The Feasibility of Identifying by Chart Review Illnesses That Are, in Retrospect, Cases of Toxic Shock Syndrome." Sponsor, Diana B. Petitti, Medical Methods Research, Kaiser Hospital, Oakland.
- Grame Mardon, second year, "Analysis of a Rous Sarcoma Virus Frameshift Mutant Suggests the SRC Gene Contains Two Functional Sites for the Initiation of Protein Synthesis." Sponsor, Harold E. Varmus, Microbiology.

A new Employee Health Promotion Program has been started by the Office of Public Service Programs. Coordinated by School of Nursing doctoral candidate Patricia Zindler-Wernet, RN, MS, the one-year program will identify, encourage and support employee self-help efforts at health promotion.

Now one month old, the program is being implemented in three phases: 1) survey of campus employees, individual health hazard appraisals and departmental workplace assessment to determine employees' health promotion needs; 2) help in developing and maintaining employee self-help groups by offering assistance in printing materials and arranging space for activities; 3) technical assistance in implementing activities, review of programs and evaluation.

Funds for the program are from the schools of Nursing, Dentistry, Medicine and Pharmacy, as well as from Hospitals and Clinics and UC-Systemwide administration. At the end of the program, the Office of Public Service Programs will produce a guide manual and will recommend types of health promotion programs that might benefit employees on all nine UC campuses. For further information call x3206.

A special committee to develop campus procedures for implementing the University's policy on preventing sexual harassment is being organized by Lewis N. Nelson, coordinator of Affirmative Action.

The 29-member committee is representative of every area of the campus. It is chaired by Rachel Bernstein, assistant Affirmative Action coordinator, and is charged with examining the University policy and proposed guidelines prohibiting sexual harassment. It will recommend procedures for processing complaints and methods for educating members of the campus community about the prevention of sexual harassment. The committee was formed at the request of UC President David Saxon.

Two UCSF researchers have recently received funding from the Robert Wood Johnson Foundation.

Wallace V. Epstein, MD, professor of Medicine and director of the Robert Wood Johnson Clinical Scholars Program, will study medical management patterns for ambulatory chronic disease patients. Steven R. Cummings, MD, clinical instructor of Medicine at SFGH, was funded for his study on social isolation in functional recovery from hip fracture.

These studies were two of 23 chosen by the Foundation in a national search for ideas that might help people impaired by disease, disorder, or injury regain their ability to perform the important tasks of everyday living. More than 200 proposals were submitted nationwide.

The next campus blood drive will be held on Monday, May 17. Donation sites are the main lounge of Millberry Union, 10 a.m. to 5:30 p.m. and the mezzanine level of the School of Nursing building, 8 a.m. to 4 p.m.

The Associated Students of UCSF will donate "dinners for two" at the Washington Square Bar & Grill. The restaurant is matching ASUCSF's donation allowing two $30 gift certificates to be given. To participate in the drawing, donors must deposit their blood donation receipts in raffle boxes at either donation site.

Lisa Hannegan, neurology intensive care unit nurse, and Robert Portnoy, an intern in clinical psychology at LPPI, were the winners of the March campus blood drive raffle.

This next drive also will include a "Recruit a Blood Donor" contest. To enter you must be a UCSF faculty, student or staff member. The three individuals who recruit the most blood donors for the blood drive and their guests will be treated to a day on the bay in a luxurious sailboat. To be eligible, you must sign up in advance by contacting Kathleen Wesner at 567-6400, x427.

Appointments for blood donations can be made by contacting the Moffitt Blood Bank at x4013, or donors may visit either donation site at their convenience. Donors with appointments will be given priority.

The blood drives are sponsored three times a year by the Irwin Memorial Blood Bank of the S.F. Medical Society, and coordinated by the Campus Tours and Speakers Bureau.

The Chancellor's Advisory Committee on the Status of Women is asking the campus community to help identify resources for women faculty, students and staff at UCSF. The committee hopes to improve the availability of existing campus services by producing a guide to campus resources for women.

All campus individuals who know of any courses, services, programs, groups, committees or activities concerning or directed toward women staff, students or faculty, are asked to send this information to Jeanne Phillips, Chancellor's Office, S 126.

UC Hospitals Auxiliary is having its annual luncheon meeting on Wednesday, May 12 at University House.

New officers elected will be: Faracita Wyatt, president; Robert Lilienthal, president-elect; Bonnie Raskin, Eric Owyang and Abe Brown, vice presidents; Ronald Rankin, treasurer; and Beulah Behrman, secretary.

In addition 12 new board members have been added: Amos Castro, MD, Jay Darwin, Judge Abbott Goldberg, Dolores Isaacson, Patricia Krevans, Penny Marshall, Carolotta Palmer, Betty Silverman, Ilsa Steinbach, Roberta Wilson and returning members Jeanette Katz and Ronald Rankin.

The week of May 7 to 14 has been proclaimed by Mayor Feinstein as "Child Passenger Safety Week" to focus public attention on the problem of California children riding improperly restrained in automobiles.

One hundred and twenty children died in California auto accidents last year and 14,000 more were seriously injured, according to Thomas K. Hunt, MD, professor of Surgery and president of the American Trauma Society. He adds that 85 percent of those deaths and injuries could have been prevented with the use of a safety belt or child safety seat.

The goals of the week are: to alert the public to the dangers of allowing children to ride in automobiles without being "buckled up," to urge parents to obtain properly designed safety seats, and to make physicians, nurses and other health professionals aware of the problem so that parents can be instructed before their baby is born on the importance of the proper use of child safety seats.

The University Research Expeditions Program at UC-Berkeley is recruiting individuals with backgrounds in health or biological sciences for small research expeditions in the U.S. and abroad during the summer months.

Expeditions include investigating possible links between diet and disease in traditional African communities, exploring marine environments for future medicine sources and studying the social implications of primate behavior in Panama.

For further information write for a free brochure to University Research Expeditions Program, University of California, Berkeley, CA 94720, or call on ATSS 8-582-6586.
